

## Transite analysis reports

**HEK293 cells following inducible overexpression of EGFP-ZFP36 fusion protein (GSE53185):**

- [k-based Transcript Set Motif Analysis report on data set GSE53185](#)
- [matrix-based Spectrum Motif Analysis report on data set GSE53185](#)

**HEK293 cells following ELAVL1 siRNA knockdown (GSE29778):**

- [matrix-based Transcript Set Motif Analysis report on data set GSE29778](#)
- [k-mer-based Transcript Set Motif Analysis report on data set GSE29778](#)
- [matrix-based Spectrum Motif Analysis report on data set GSE29778](#)

**non-small cell lung cancer patients at diagnosis or at recurrence after cisplatin-based chemotherapy (GSE7880):**

- [matrix-based Transcript Set Motif Analysis report on data set GSE7880](#)
- [k-mer-based Transcript Set Motif Analysis report on data set GSE7880](#)
- [matrix-based Spectrum Motif Analysis report on data set GSE7880](#)
- [k-mer-based Spectrum Motif Analysis report on data set GSE7880](#)

**shRNA knockdown against hnRNPC in HepG2 cells followed by RNA-seq:**

- [k-mer-based Spectrum Motif Analysis report on data set GSE87993](#)
